

Business Analyst Engineering

For our client in Vlissingen we are hiring a **Business Analyst Engineering**.

Job description

Do you have a passion for optimizing complex systems and bridging the gap between engineering and IT? We are looking for a Business Analyst Engineering to support and enhance the engineering department's business applications. In this role, you will play a key part in ensuring effective collaboration between engineering and IT, contributing to the success of innovative naval projects. If you are a problem solver with a sharp analytical mind, we want to hear from you!

Responsibilities

- ✓ Working closely with engineers, IT specialists, and other stakeholders to gather and document business requirements, specifications, and processes.
- ✓ Analyzing data and engineering workflows to identify trends and generate actionable insights that drive improvements.
- ✓ Identifying inefficiencies within engineering processes and recommending solutions to enhance productivity and reduce costs.
- ✓ Evaluating the financial implications of engineering decisions and providing recommendations that align with the organization's business objectives.
- ✓ Acting as the key point of contact between Engineering and IT, ensuring seamless collaboration and alignment with project goals.
- ✓ Assisting in the implementation of new systems, processes, and technologies, contributing to continuous organizational improvement.
- ✓ Maintaining clear and comprehensive documentation, including project plans, business cases, and process flows, to ensure transparency.
- ✓ Assessing new technologies and tools that can improve the efficiency and effectiveness of engineering operations.
- ✓ Supporting knowledge transfer and ongoing process improvements within the team.

Your qualifications

- ✓ A Bachelor's or Master's degree in a relevant field, along with at least three years of professional experience.
- ✓ Familiarity with engineering tools, project management processes, IT platforms, and software development.
- ✓ Experience with project management tools and ideally exposure to naval or other complex engineering projects.
- ✓ Fluency in English; Dutch language skills are a plus.
- ✓ Core competencies: Customer focus, results-driven, quality orientation, teamwork, initiative, and critical thinking.
- ✓ Excellent references, as a pre-assignment security screening is a standard part of the recruitment process.

- ✓ Permanent EU citizenship and passport are required. Candidates with an EU work visa or those holding dual (EU/non-EU) nationality are not eligible due to security requirements associated with the military nature of the projects.
