# DevOps Architect

For one of our customers in the province "Zuid-Holland" we are looking for a **DevOps Architect**.

## Job description

As a DevOps Architect within our Managed Services team, you will focus on automating and optimizing management processes. You will analyze ICT environments and help clients modernize their IT landscapes by applying AI within management processes. In this role, you will create and implement a technical roadmap and communicate it effectively to stakeholders.

Primary Responsibilities
- Automate and optimize IT management processes for clients.
- Analyze ICT environments and develop modernization strategies.
- Create and implement technical roadmaps with a focus on applying AI in management processes.

Support Functions:
- Provide strategic advice and guidance to clients on modernizing their IT landscape.
- Collaborate with teams to implement AI-driven solutions for management workflows.

Management & Leadership:
- Lead the technical implementation of roadmaps in alignment with business objectives.
- Communicate effectively with stakeholders and clients to ensure alignment on goals and strategies.

Process & Improvement:
- Continuously assess and enhance ICT environments using modern DevOps practices and AI technologies.
- Propose improvements for IT processes and solutions that drive business value.

Additional Responsibilities:
- Stay updated on the latest technologies related to DevOps, cloud, and AI.
- Travel Requirements: Minimal travel required.

## Your qualifications

Education
- Relevant certifications in Microsoft technologies.

Skills & Experience
- 8+ years of experience as an architect in complex Microsoft environments.
- Proficiency in Terraform, DevOps, Microsoft CAF model (Cloud Adoption Framework), and Azure Cost Management.
- Strong knowledge of monitoring packages and solutions.
- Proven ability to translate complex problems into logical, technical solutions.
