

Dynamics 365 Power Platform Developer

For one of our customers in the province Utrecht we are looking for a **D365 Power Platform Developer**.

Job description

As a Senior Dynamics 365 Power Platform Developer, you will drive your career and personal growth with the support of our organization. You will work closely with clients, delivering impactful business solutions and process optimizations using the latest Microsoft technologies.

Primary Responsibilities:

- ✓ Gather requirements, design, develop, and implement Dynamics 365 Power Platform solutions for industries like AEC (Architecture, Engineering, Construction) and Legal.
- ✓ Deliver business and software application services, crafting sustainable solutions for client needs.
- ✓ Customize and configure Dynamics 365 Power Platform, excelling in Plugins, TypeScript, Power Automate, and Power Apps.

Support Functions:

- ✓ Provide technical troubleshooting, offering timely solutions for complex issues.
- ✓ Collaborate with stakeholders and communicate project progress effectively.
- ✓ Mentor junior developers and conduct comprehensive code reviews.

Management & Leadership

- ✓ Take on Architect roles and responsibilities when needed.
- ✓ Proactively advise clients on industry best practices and serve as a professional ambassador for the organization.

Process & Improvement:

- ✓ Adhere to coding standards and deliver high-quality, maintainable code.
- ✓ Identify and mitigate project risks, consistently exceeding customer expectations.

Additional Responsibilities:

- ✓ Participate in pre-sales activities as required.
- ✓ Travel Requirements: Minimal travel required.

Your qualifications

Education:

- ✓ Strong technical knowledge of Dynamics 365 Power Platform.

Skills & Experience:

- ✓ Proficiency in Dutch and English (spoken and written).
- ✓ Expertise in configuring build and release pipelines using YAML in Azure DevOps, and experience with GIT for version control.
- ✓ Optional experience with Azure Integrations (Azure Functions, Logic Apps, Service Bus) and Power

Pages.
