

## IT Project Manager

For a client in Vlissingen, we are hiring an **IT Project Manager**

### Job description

As an IT Project Manager, you will ensure timely delivery of in-house IT projects aimed at enhancing business solutions and optimizing the IT environment. You will draft and get approval of the specifications for solutions and deliverables through close collaboration with internal customers. You also manage to make them aware of their stake in adopting business changes to fully leverage new solutions. Your projects will range from IT infrastructure improvements to business applications and digital collaboration platforms.

### Your qualifications

In this role, your responsibilities will include:

Delivering IT projects end-to-end according to set KPI's, with continuous stakeholder engagement.

Creating detailed forecasts based on necessary resources—budget, timelines, and external resources—to validate proposals and define KPI's.

Defining required capabilities over the project timeline and assigning (external) project members accordingly.

Proactively monitoring and mitigating risks that threaten project success.

Identifying and managing dependencies with other projects for seamless integration and execution.

Reporting key metrics to stakeholders on project status, development, risks, and issues.

Advising and supporting improvements in project (portfolio) management.

### SKILLS & EXPERIENCE

Proven success in delivering IT projects within complex business environments with multiple stakeholders.

Excellent stakeholder management and influencing skills to create buy-in and strong engagement.

Solid knowledge and experience with waterfall and Agile/Scrum projects.

Relevant master's or bachelor's degree, preferably supplemented with project management qualifications.

Ability to work frequently on-site at our offices in Vlissingen and Schiedam.

Proficiency in Dutch and English, both written and spoken.
