

## Project Support Engineer

Voor onze klant in Aalsmeer zijn we op zoek naar een **Project Support Engineer**.

### Job description

The Project Support Engineer plays a crucial role in managing engineering-related data within Teamcenter. This individual will oversee project administration, ensuring that all project data is consistent, accurate, and up-to-date. The Project Support Engineer will collaborate closely with the project manager and other stakeholders, such as document controllers and project engineers, to ensure that all project data is processed efficiently.

Key Responsibilities:

- ✓ Facilitate the proper input of data into Teamcenter from both internal and external parties.
- ✓ Support Procurement in generating data sets for suppliers.
- ✓ Follow up with the project team to complete any missing data sets.
- ✓ Identify and implement improvements in the administrative processes of the Engineering Department.
- ✓ Share insights and best practices with fellow officers.
- ✓ Maintain thorough knowledge of Product Lifecycle Management (PLM) applications, preferably Teamcenter.
- ✓ Utilize tools such as Teamcenter, SharePoint, Floor2Plan, and Relatics effectively.

### Your qualifications

- ✓ Proficiency in English and Dutch.
- ✓ Strong experience with Product Lifecycle Management (PLM) applications, particularly Teamcenter.
- ✓ Familiarity with document management systems and collaboration tools like SharePoint and Relatics.
- ✓ Detail-oriented with a strong focus on data accuracy and consistency.
- ✓ Excellent communication skills for collaboration with various stakeholders.
- ✓ Problem-solving mindset with the ability to implement process improvements.
