

Site Civil Engineer

For one of our customers we are in search for a **Site Civil Engineer**

Job description

- ✓ To support the Project Engineering Manager, in the performance of his/her duties, deputising as required.
- ✓ Work closely with the Execute contractor to ensure that all Civil, Structural and Architectural (CSA) Engineering issues are properly resolved in a timely manner, that design changes are managed correctly, and that the facilities comply with all project and statutory requirements and Stakeholder expectations.
- ✓ Monitor site CSA construction work performed by the Execute Contractors and other third party designers/vendors/subcontractors, providing oversight and guidance, ensuring that all work satisfies project specifications and standards and meets or ideally is better than the project schedule and cost targets.
- ✓ Support and improve coordination between: site and home office engineering, construction and engineering, with other functions and disciplines.

Your qualifications

- ✓ Excellent team player.
- ✓ Strong interpersonal, communication and influencing skills.
- ✓ Strong planning and organizing ability.
- ✓ Highly motivated, achievement oriented.
- ✓ Ability to interface effectively with people of all levels, both internal and third parties, and with wide ranging cultural backgrounds.
- ✓ Able to define and prioritize issues and then solve the problems through networking with other team members or external sources.
- ✓ Innovative, with an eye for identifying opportunities to reduce costs and challenge the status quo.
- ✓ Good understanding of business drivers and ability to align design philosophies.
- ✓ Broad estimating skills and practical understanding of costs (capital, operating, life cycle).
- ✓ Willing and flexibility to travel.
- ✓ Good verbal and written communication skills in English.

It would be advantageous if the candidate would also have the following background and work experience:

- ✓ Major project experience with strong design engineering/procurement background and a broad understanding of multiple disciplines and their interfaces.
- ✓ Experience of field engineering on a major project oils and gas or petrochemicals construction site working with EPC contractors and their subcontractors.
- ✓ Proven track record of delivering leading SHE performance.
- ✓ Experience of supervising work in a Module Fabrication Shop.
- ✓ Acting as an owners representative on a major project.

Specific Role Requirements:

- ✓ Degree qualified and chartered or equivalent in appropriate engineering discipline.
- ✓ More than 15 years' experience in Engineering role in Oil and gas or Petrochemical setting.
- ✓ Seasoned and experienced Engineer.
- ✓ Sound knowledge of key discipline areas including:

Belgium Civil regulations and laws.

Roles and Responsibilities of Notifiable Bodies, and their equivalent.
