

Technical Specialist in Electrical Systems

For our client in Vlissingen we are hiring a **Technical Specialist in Electrical Systems**.

Job description

We are currently looking for an energetic Technical Specialist in Electrical Systems to spearhead the development, guidance, and engineering efforts associated with specialized topics within our projects. As an integral member of our team, you will utilize your extensive knowledge and expertise in Electrical Systems to enhance and advocate for these vital areas. Collaborating with a select group of experts, you will play a crucial role in research initiatives, proposals, and engineering projects, ensuring performance validation during critical project phases.

This is a chance to engage in innovative projects within a vibrant and collaborative atmosphere, with access to ongoing professional growth and development opportunities! If you're prepared to elevate your career and make a notable impact in Electrical Systems, we invite you to apply now to join our team!

Key Responsibilities

- ✓ Acting as a technical authority, offering essential insights and solutions for intricate projects across research, proposals, and engineering.
- ✓ Assisting in design evaluations and validation tests to guarantee compliance with project requirements and specifications.
- ✓ Contributing significantly to the advancement and promotion of your field of expertise, encouraging innovation and ongoing improvement.
- ✓ Producing high-quality engineering outputs within set timelines while adhering strictly to all relevant standards.
- ✓ Leading continuous improvement initiatives within the department to enhance tools, processes, and knowledge sharing.

Your qualifications

- ✓ A Bachelor's or Master's degree in a relevant discipline, along with at least five years of hands-on experience.
- ✓ Expertise in power generation, conversion, energy storage, and electrical distribution systems within complex project settings, especially in naval or offshore environments.
- ✓ An understanding of maritime system dynamics and control systems is a plus.
- ✓ Experience in academic research and collaboration with research institutions, universities, and industry partners is desirable.
- ✓ Proficiency in both Dutch and English, with strong written and verbal communication skills.

Excellent references, as a standard part of our recruitment process includes a pre-employment security screening.

Important

- ✓ Permanent EU citizenship and a valid passport are mandatory; candidates with NL/EU work visas or

those holding both EU and non-EU nationalities/passports are not eligible due to the military nature of our projects.
