

## Technical System Integration Manager Verification and Validation specialized in Structures, Shipbuilding & Outfitting (Interim)

For our client in Vlissingen we are hiring a **Technical System Integration Manager Verification and Validation specialized in Structures, Shipbuilding & Outfitting (Interim)**.

### Job description

We are looking for an experienced interim Technical System Integration Lead for Verification & Validation, with a strong background in Structures, Shipbuilding, and Outfitting, to take charge of verification and validation activities within large-scale projects. If you have a solid track record in shipbuilding or related industries and are ready to play a pivotal role in ensuring technical excellence, we would like to meet you!

In this interim position, you will manage and coordinate the Verification and Validation (V&V) processes, collaborating with a variety of stakeholders, including engineering, quality control, and testing teams. You will oversee the integration of complex systems while ensuring timely delivery and high-quality standards for subcontracted work packages.

### Key Responsibilities

- ✓ Leading the preparation and submission of all V&V documentation, ensuring accuracy and timely delivery.
- ✓ Managing a multidisciplinary team, including engineers and V&V specialists, to ensure successful project integration.
- ✓ Tracking and monitoring requirements for comprehensive scope and ensuring seamless integration of systems and equipment.
- ✓ Ensuring that all technical documentation meets specification requirements and maintaining traceability across all processes.
- ✓ Coordinating the delivery and review of client documentation to ensure compliance with contract specifications.
- ✓ Facilitating Design Reviews and acting as the escalation point for any compliance or integration issues.
- ✓ Overseeing test preparation and managing the test schedule across all relevant phases of the project.
- ✓ Managing the planning and execution of Factory Acceptance Tests (FAT), ensuring technical protocols are in place and met.
- ✓ Participating in key contractual tests and trials (FAT, HAT, SAT), ensuring quality standards are adhered to.
- ✓ Ensuring smooth project synchronization and communication, including effective collaboration with subcontractors.

### Your qualifications

- ✓ A Bachelor's or Master's degree in Engineering or a related discipline, with at least five years of

experience in engineering, supplier coordination, and project management, preferably within shipbuilding or similar industries.

- ✓ Strong expertise in Structures, Shipbuilding & Outfitting, with experience working on Class-regulated products.
- ✓ Proven ability to manage complex systems and lead multi-disciplinary teams, subcontractors, and engineering requirements.
- ✓ Fluent in English, with proficiency in German being a plus.
- ✓ Key competencies: Customer focus, quality orientation, teamwork, leadership, planning, and strong communication skills.
- ✓ Excellent references, as a pre-assignment security screening is standard in the recruitment process.
- ✓ Permanent EU citizenship and passport are required. Candidates with an EU work visa or dual nationality (EU/non-EU) are not eligible due to the security requirements of the project.
