

Workpreparator - Field Supervisor E&I Belgium / UK

For our client we are in search for a **Workpreparator - Field Supervisor E&I** for a prestigious project

Job description

- ✓ Accountable for the preparation, quality and delivery of all information required for their allocated work packs within the agreed milestones.
- ✓ Prepare job sketches (or drawings if possible) that clearly identify the scope and materials. Where required these may also incorporate any specific field construction instructions including fabrication, site run and supports.
- ✓ Ensure all inspection and operations requirements including agreed isolations are incorporated.
- ✓ Preparation of SIP (scaffold, insulation or painting) requests that are detailed and clear.
- ✓ Prepare bills of material (BoM) that are correct and accurate – check against approved pipe and/or valve specifications. Clearly identify direct purchase materials or contractor supplied (e.g. consumable)
- ✓ Prepare the Job breakdown identifying all 3rd party requirements and resources hours using agreed norms or estimates.
- ✓ Identify any long lead or special items to the appropriate discipline engineer for approval.
- ✓ During the preparations phase, take a leading role in developing construction methodologies and schedules which deliver the scope within the system windows. Consider any other scopes, simultaneous operations or SHE/permit requirements to prepare robust and tested plans with the planning team.
- ✓ During the commissioning execution phase, move into a supervisory role and lead the work in the field, coordinating resources, materials, permits and everything necessary to complete the work on time, in budget, to the design intent and to the required HSE and quality standards.

Your qualifications

- ✓ Trade Qualifications or equivalent in Electrical or Instrument and Control discipline
- ✓ Relevant experience in a similar role
- ✓ Experienced in Construction Supervision
- ✓ Knowledge of Instrument and Electrical design principles including an understanding of petrochemical process hazard and risk assessment as it applies to instrument and electrical process equipment and its associated systems.
- ✓ Ability to interpret P&IDs and all associated E&I diagrams such as loop, wiring, cable block, terminations, GA's, routings etc. and cable schedules
- ✓ Experience of working within multi-disciplined engineering teams
- ✓ Able to communicate effectively at all levels
- ✓ Experienced Excel user and all other MS office applications
