

Electrical Engineer

For one of our customers we are in search for a **Electrical Engineer**.

Vacature omschrijving

- Developing functional descriptions, drawings, and other engineering documents for power distribution, lighting, and other electrical systems.
- Creating and maintaining specification documents for all electrical components and installation processes.
- Drafting detailed test and validation plans to ensure compliance with regulations and customer requirements during virtual and real-world testing phases.
- Managing vendors and subcontractors to ensure timely project contributions.
- Reviewing vendor and subcontractor designs and integrating them into designs.
- Developing and describing standards and methodologies for detailed engineering and commissioning.
- ✔ Providing support in proposal stages by developing conceptual designs of electrical power systems.
- ✓ Offering technical support or commissioning activities for projects under contract.

Je profiel

- → 3+ years of experience designing complex electrical systems, including large power distribution systems, preferably in industrial settings.
- Experience in designing EMC-compliant solutions.
- Professional experience in complex projects involving multidisciplinary teams and multiple suppliers/subcontractors.
- ✓ Experience working in a model-based system engineering environment.
- ✓ Bachelor's or Master's degree in Electrical Engineering or a relevant discipline.
