

ICT Projectleider ISU Migratie

For one of our customers in Oost-Vlaanderen, we are looking for a **SAP Project Manager**.

Vacature omschrijving

You will be deployed as ICT project leader on the ISU migration project from SAP R3 to SAP S4.

The aim of the project is to set up the new ISU S4 environment on the one hand, as well as to realize the data migration.

A number of interim steps will also be taken to transfer some data to other systems so that the migration is partly simplified.

This project is part of a larger program, namely HST 'high-speed transition'.

As an ICT PL you actively work with the project leader to ensure everything runs smoothly. You manage various IT teams and are responsible for the delivery of a high-quality and working whole according to the agreed schedule.

You manage the teams during the different phases of the project: analyzing, designing, building, testing and rolling out.

Je profiel

You have knowledge and experience in leading larger IT projects where activities are carried out by different IT teams.

Specific experience in the domains of low code, API data exchange and SAP S4HANA and R3 is a plus.
