IT - Line Manager IT Assurance & Resilience Readiness

For one of our customers in the province "Zeeland" we are looking for an **IT Compliance and Resilience Lead**.

Vacature omschrijving

You will lead the Cyber Resilience Readiness team, focusing on responding to and recovering from high-impact cyber incidents and crises. This role involves guiding, coaching, and developing a small team to achieve high performance while supporting IT continuity, crisis management, and resilience training across the organization.

Key Responsibilities:
- Shape and build the Assurance & Resilience department, contributing to its vision, strategy, and roadmap.
- Manage the Cyber Resilience Readiness team to address IT Continuity, Crisis Management, and Resilience Training.
- Identify staffing needs and ensure the team has the required competencies aligned with department strategy.

Support Functions:
- Collaborate with adjacent functional and operational disciplines to ensure effective interface management.
- Support the ARTs (Agile Release Trains) with continuity-related activities within IT.

Management & Leadership:
- Provide leadership, guidance, and direction to a small, globally operating team.
- Foster an open and transparent environment, promoting trust and supporting the growth of team members.
- Manage people-related CAPEX and OPEX in line with budgets and monitor financial performance.

Process & Improvement:
- Drive the development of strategic and people-related objectives for the department.
- Implement improvements and ensure readiness for responding to high-impact cyber incidents.

Additional Duties:
- Engage with stakeholders at all organizational levels to drive initiatives and build strong relationships.
- Travel Requirements: No travel required.

Je profiel

Qualifications and Skills:
- Education: Bachelor's degree with substantial work experience or Master's degree with equivalent experience.

Skills & Experience:

✔ 3-5 years of experience managing teams in a relevant environment, preferably in IT security, compliance, and continuity.

✔ Proven ability to work in high-pressure environments and lead teams effectively.

Technical Skills:

✔ Conceptual knowledge of IT security, compliance, and continuity.

✔ Having security certificates (e.g., CISSP, CISM) or other relevant security certifications is preferred.

Soft Skills:

✔ Strong stakeholder management skills and the ability to build relationships of trust at different organizational levels.

✔ Excellent communication and leadership skills with a proactive "can-do" mentality.

✔ Ability to operate independently, demonstrate ownership, and focus on delivering results.

Other Requirements:

✔ Ability to guide and coach team members to foster high-performing teams.

✔ Strategic mindset with a passion for driving innovative solutions.
