

# **Project Support Engineer**

Voor onze klant in Aalsmeer zijn we op zoek naar een **Project Support Engineer**.

# **Vacature omschrijving**

The Project Support Engineer plays a crucial role in managing engineering-related data within Teamcenter. This individual will oversee project administration, ensuring that all project data is consistent, accurate, and up-to-date. The Project Support Engineer will collaborate closely with the project manager and other stakeholders, such as document controllers and project engineers, to ensure that all project data is processed efficiently.

#### Key Responsibilities:

- Facilitate the proper input of data into Teamcenter from both internal and external parties.
- Support Procurement in generating data sets for suppliers.
- ✓ Follow up with the project team to complete any missing data sets.
- ✓ Identify and implement improvements in the administrative processes of the Engineering Department.
- ✓ Share insights and best practices with fellow officers.
- Maintain thorough knowledge of Product Lifecycle Management (PLM) applications, preferably Teamcenter.
- Utilize tools such as Teamcenter, SharePoint, Floor2Plan, and Relatics effectively.

## Je profiel

- ✓ Proficiency in English and Dutch.
- ✓ Strong experience with Product Lifecycle Management (PLM) applications, particularly Teamcenter.
- ✓ Familiarity with document management systems and collaboration tools like SharePoint and Relatics.
- ✓ Detail-oriented with a strong focus on data accuracy and consistency.
- ✓ Excellent communication skills for collaboration with various stakeholders.
- ✓ Problem-solving mindset with the ability to implement process improvements.
