

Software Developer

For our client in Vlissingen we are hiring a **Software Developer**.

Vacature omschrijving

We are looking for a skilled Software Developer to join our Business Systems Team. In this role, you will collaborate with architects, infrastructure engineers, application engineers, and fellow developers to build application components and data interfaces. You will contribute to the implementation of projects within complex IT environments, ensuring seamless integration and functionality.

Key Responsibilities

- ✓ Participate in IT, business, and security projects.
- ✓ Develop application components, including web APIs, microservices, and system customizations.
- ✓ Contribute as a key team member, offering technical expertise and support.
- ✓ Work closely with architects, network and infrastructure engineers, information managers, and application engineers to create robust solutions.

Je profiel

- ✓ Bachelor's degree in information technology, software development, or a related field.
- ✓ Proven affinity with software development and a minimum of five years of relevant work experience.
- ✓ Proficiency in C# 8+, .NET 5, .NET 6, .NET Core, SOLID principles, design patterns, and test-driven design.
- ✓ Experience with technologies such as Docker (Kubernetes preferred), Active Directory (LDAPS & ADFS), Service Bus, AMQP, RabbitMQ, AutoMapper, CI/CD pipelines, test automation, GIT, and code reviews.
- ✓ Strong knowledge of RESTful web APIs, JSON, XML, SQL, and monitoring tools like Grafana.
- ✓ Fluency in both Dutch and English, with excellent verbal and written communication skills.
